

BREAK THE PLATE – GROUNDING KIT

Please install the grounding kit as shown in the 3 pictures. The kit consists of 2 wires (part #s: CA-HAR-BTP-18 & CA-HAR-BTP-19) & a 10-32 kep nut.

The braided wire connects to the top of the left solenoid plate on each of the 3 monitors (page 2) & the yellow connector connects to the barrier strip with the **BLACK WIRES** (page 3). **DO NOT CONNECT WIRE TO BARRIER STRIP WITH THE YELLOW WIRES!**

The black wire also connects the barrier strip with the **BLACK WIRES** (page 3) & the other end gets fastened using the kep nut to the grounding plate on the rear right floor of the cabinet (page 4).
